

Huy Nguyen — Software Engineer

📞 +84 944 688 134 • ✉️ xhuyzdev@gmail.com • 🌐 xhuyz.me • 🐙 XhuyZ

Objective

Software Engineering graduate with a strong full-stack background and hands-on experience across backend development, frontend, mobile, and DevOps practices. Seeking a Software Engineer position where I can apply my skills in system design, API development, and CI/CD automation to build scalable, reliable software in a collaborative and growth-oriented environment.

Education

FPT University

Bachelor of Software Engineering

GPA: 2.9/4.0

Ho Chi Minh City

2021 – 2025

Interests & Personality

Passionate about building well-architected software systems, Linux, open-source solutions, and automation. Proactive, communicative, and team-oriented, with a strong willingness to learn, take ownership of tasks, and contribute meaningfully to engineering teams.

Technical Skills

Backend: ASP.NET Core, NestJS, Golang

Frontend: ReactJS, React Native

Database: PostgreSQL, MySQL, MongoDB, SQLite

DevOps: Linux (Redhat, Debian, NixOS), Docker, GitHub Actions, Nginx, Grafana, Prometheus, Terraform, Ansible

Cloud: AWS

Languages: English (IELTS 6.0), Chinese (HSK 4)

Projects

GroupTrip AI Platform: AI-powered travel planning platform providing intelligent itinerary generation and group recommendations.

Role: Full Stack Developer **Team Size:** 5

Contribution: Implemented full-stack features for core modules including trip management, user management, real-time chat, and payment workflows. Designed and consumed RESTful APIs, containerized services with Docker, and established CI/CD pipelines via GitHub Actions to automate build, test, and deployment processes.

Stack: ASP.NET Core • React • Flutter • REST API

Live: [grouptrip.site](#) • [API Docs](#)

Status: Ongoing Development

Harmony Hub: Pre-marital counseling platform connecting users with consultation services and educational resources.

Role: Full Stack Developer **Team Size:** 4

Contribution: Built a responsive React frontend and designed secure RESTful backend APIs using ASP.NET Core with JWT authentication. Integrated Cloudinary for media management and VNPAY for online payment processing.

Stack: React • ASP.NET Core • MySQL • Vercel

🔗 [View Source Code](#)

FootballMatch App: Mobile application for organizing football matches and connecting players.

Role: Mobile Developer **Team Size:** 3

Contribution: Developed the mobile UI in Java, integrated Firebase Realtime Database for live data sync, implemented push notifications, and built match scheduling and team coordination features.

Stack: Java • Firebase • SQLite

 [View Source Code](#)

Lazysys: TUI application for managing systemd services on Linux.

Role: Full Stack **Team Size:** 1

Contribution: Designed and built the entire application from scratch, demonstrating proficiency in systems programming, component-based UI architecture, and local data persistence.

Stack: Golang • BubbleTea • SQLite

Experience

Ai Nghia General Clinic

Bien Hoa City

Software Developer

Jun 2025 – Dec 2025

Worked on a production healthcare system serving real clinical operations. Contributed to developing an Android TV application integrated with IoT devices to support patient-calling and doctor display workflows. Participated in optimizing a high-IO backend system by migrating messaging infrastructure from Firebase Cloud Messaging (FCM) to RabbitMQ, improving system reliability and scalability under load.

FPT Software Academy

Ho Chi Minh City

Intern / Full Stack Developer (OJT)

Sep 2024 – Dec 2024

Completed an enterprise On-the-Job Training program within a Scrum-based team of 15 members. Contributed to backend API development and participated in sprint-based design reviews guided by senior engineers. Gained hands-on experience integrating cloud services, implementing JWT-based authorization, and building robust RESTful APIs in a professional software development workflow.
