

Huy Nguyen — DevOps Intern (Background: Full-Stack Developer)

📞 +84 944 688 134 • ✉️ xhuyzdev@gmail.com • 🌐 xhuyz.me • 🐙 XhuyZ

Objective

Software Engineering student with a full-stack background, focusing on DevOps practices including Linux systems, automation, CI/CD, and service monitoring.

Education

FPT University

Bachelor of Software Engineering

Ho Chi Minh City

2021 – 2025

Interests & Personality

Interested in Linux, open-source solutions, and contributing to open-source projects. Proactive, communicative, and team-oriented, with a strong willingness to learn and explore new technologies.

Technical Skills

Backend: .NET

Database: PostgreSQL,

Frontend: React, React Native

DevOps: Linux, Docker, Github Actions

Languages: English (IELTS 6.0), Chinese (HSK 4)

Projects

GroupTrip AI Platform: AI-powered travel planning platform providing intelligent itinerary generation and group recommendations.

Role: Full Stack **Team Size:** 5

Contribution: Worked as a Full Stack Developer, implementing both frontend and backend for core modules including trip management, user management, real-time chat, and payment workflows. Containerized services using Docker and set up CI/CD pipelines with GitHub Actions to automate build, test, and deployment processes. ""

Stack: .NET • React • Flutter • Restful

Live: grouptrip.site • [API Docs](#)

Status: Ongoing Development

Harmony Hub: Pre-marital counseling platform connecting users with consultation services and educational resources.

Role: Full Stack **Team Size:** 4

Contribution: Developed responsive frontend with React and built secure backend APIs with JWT authentication, integrating Cloudinary for media handling and VNPAY for online payments.

Stack: React • ASP.NET • MySQL • Vercel

🔗 [View Source Code](#)

FootballMatch App: Mobile application for organizing football matches and connecting players.

Role: Mobile Developer **Team Size:** 3

Contribution: Built mobile UI with Firebase Realtime Database, implemented real-time updates and push notifications, and developed match scheduling and team coordination features.

Stack: Java • Firebase • SQLite

Experience

FPT Software Academy

Intern / Full Stack Developer (OJT)

Ho Chi Minh City

Sep 2024 – Dec 2024

Participated in an On-the-Job Training program within an enterprise environment, working in a Scrum-based team of 15 members. Collaborated on backend feature development, with guidance from mentors through sprint-based API design and review sessions. Gained hands-on experience integrating cloud services, implementing authorization mechanisms, and understanding frontend-backend communication via RESTful APIs in a professional software development workflow.

Ai Nghia General Clinic

Frontend Developer

Bien Hoa City

Jun 2025 – Dec 2025

Worked on a real-world healthcare system, gaining first-hand experience with clinic operations and production environments. Contributed to developing an Android TV application integrated with IoT devices to support patient calling and display workflows for doctors. Observed and participated in optimizing a high-IO database system by transitioning messaging from Firebase Cloud Messaging (FCM) to RabbitMQ to improve reliability and scalability.
