

Academic Integrity Report

Report type: Academic Integrity

Generated by: teacher1

Scope: Course 1 - Algorithm Foundations (Teacher: teacher1)

Generated at: 2026-04-21 20:54:09

Total Assignments

3

1 course scope

Total Submissions

42

50 versions in last 30 days

Suspicious Rate

11.9%

5 high-risk cases

Pending Reviews

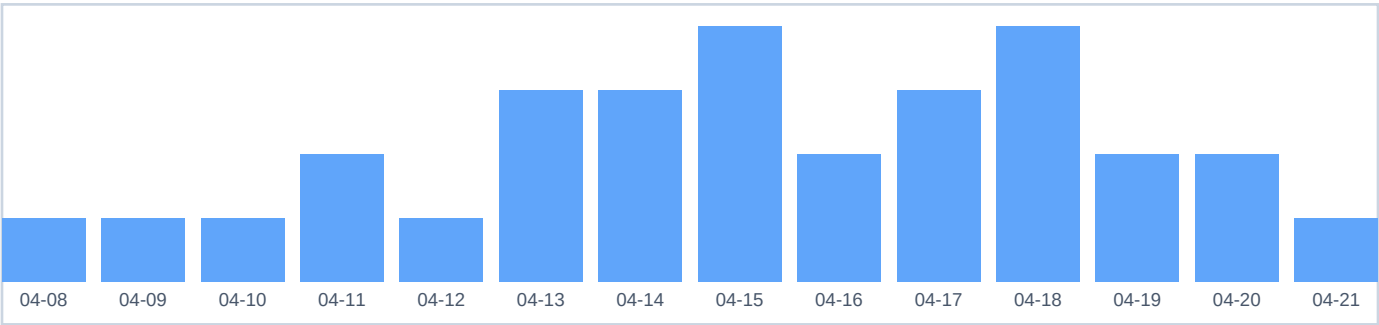

1

4 reviewed cases

Executive Summary

- The selected scope covers 3 assignment(s) across 1 course(s).
- 42 submission record(s) are currently stored, with 1400% completion against the assignment baseline.
- 5 high-risk submission(s) were detected, and 4 of them already have a review verdict.

Submission Trend Snapshot

Peak activity was recorded on 2026-04-15. The chart above shows the last 14 day(s) of submission version activity.

Risk and Verdict Summary

Similarity Distribution

Low (<40%): 0
Medium (40%-70%): 1
High (>70%): 4

Verdict Overview

Confirmed copy: 2
Need more review: 1
Valid after review: 1
Pending review: 1

Assignment Breakdown

Assignment					
		Subs	Students	Avg score	Flags
					Deadline
Assignment 1 - Array Sum Analyzer		30	30	84.1	3
					2026-04-16
Assignment 3 - Fibonacci Optimizer		12	12	75.8	2
					2026-04-19
Assignment 2 - Recursive Thinking		0	0	0.0	0
					2026-04-28

Recommended
Actions

- Complete manual review for 1 unresolved high-risk submission(s) to keep the integrity queue under control.
- Similarity risk is currently 11.9%, so prioritizing AST evidence review for top cases will reduce false positives.
- Submission activity peaked on 2026-04-15; consider sending deadline reminders and scaling judge capacity around peak windows.
- Assignment 2 - Recursive Thinking has no submissions yet, so the teaching team should verify assignment visibility and learner communication.
